Chapter 4: System Design

4.1 Introduction
4.2 Development Tools and Technologies
4.3 System architecture (System layers: Frontend, Backend, Database).
4.4 Website map(a diagram or structured list that shows the main pages of the website/system and how they are connected.)
4.5 UI/UX (design of the system screens)
4.6 Database schema (Relational Model)

Chapter 5: System Implementation & Testing
5.1 Introduction
5.2 System Tools
5.3 Core features implemented (CRUD operations working).
5.4 User Interface organized and documented.
5.5 Source code organized and documented.
5.6 Test plan and test cases prepared.
5.7 Testing the core features with sample data.

Chapter 6: Conclusions and Future Work
6.1 Introduction
6.2 Project Summary
6.3 Project Contributions
6.4 Conclusion and Future Work
